Swiss - Finn Wing Mast

Euro Pricelist 11/2007

SWISS-FINN Wing Mast STANDARD SPECIFICATION

Finite element computer analysis was used to calculate the loadings in the composite spar so that the optimum laminate specification could be developed in a multiaxial matrix of high modulus carbon Fibres and moulded with individual mast bend characteristic.

References and values for the deformations were obtained by consulting the competitors and the sail makers, and the shape dimensions were following exactly the limits of the class rules: in thickness, we're everywhere at the minimum allowed, not one millimetre in excess, and in length, we exploit as best as we can the available lengths in a fair continuous taper, so that we get at the end "low" relative thickness aero-sections.

Wilke wing carbon mast fully fitted including:

Fibre moulded gooseneck, halyard crane, halyard hook, spectra halyard, halyard sheaves, deck and foot ring, vang rope, and measurement certificate

Finish Black (Carbon natural).....	€	2900.00
Finn Mast Label.....	€	26.50
Mast cover.....	€	65.00
Finn main sail (spare) halyard.....	€	65.00
Finish colour painted (additional).....	€	200.00
Wilke Finn carbon rudder	€	1000.00
Rudder cover.....	€	42.00

All prices in EURO, excluding VAT (7.6%), Delivery ex yard

To date more than 670 Finn Wing masts of the new generation have been delivered from our yard in Switzerland.

The success can be seen on all major regattas – worldwide, the most Finn cracks are using Wilke Finn masts.
